

THE HEALTHCARE DATA PLATFORM

# The MDClone ADAMS Platform

For Innovation

MDCLONE

CREATE A DATA-DRIVEN ECOSYSTEM

# A Powerful Healthcare Innovation Infrastructure

When health systems are at the center of an ecosystem driving innovation, the possibilities are limitless.

## PUSH PAST YOUR OWN FOUR WALLS

However, the current safeguards used to protect health data can create cumbersome processes that limit data use and significantly deter collaboration with external partners. Pushing innovation forward in healthcare requires an approach that preserves patient privacy and confidentiality, offering uncomplicated access to real-world health data.

## UNLOCK CREATIVITY

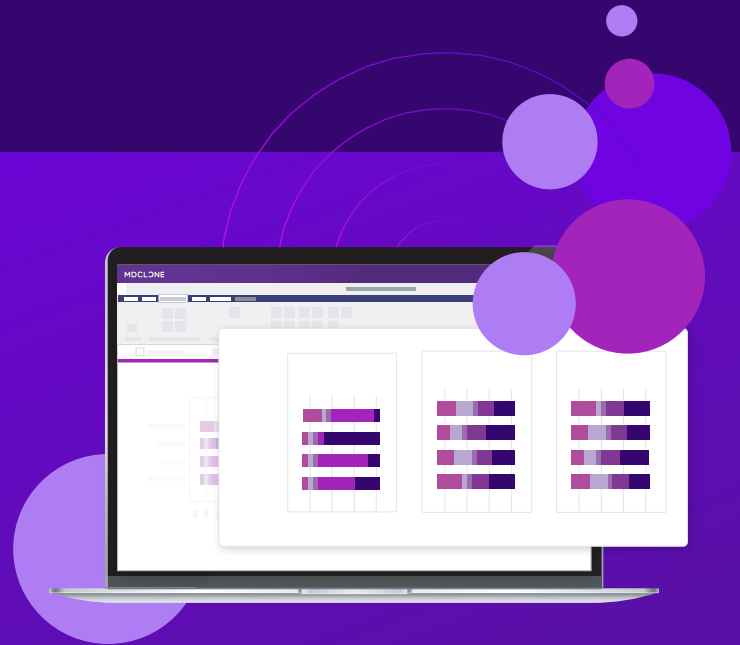

Discover a secure and controlled environment enabling users to work with internal teams, third parties, and outside vendors who have common interests to conduct research and share specific data.

Free your most important asset — your creativity — to explore ideas and find new ways to improve outcomes. With the MDClone ADAMS Platform, health data are protected, and innovation can accelerate.

## OUTSIDE COLLABORATION

Push innovation to new heights and expand your network. Explore non-traditional partnerships, combine expert teams, and analyze data within a secure, controlled environment.

- + Work together on projects within shared areas of clinical interest
- + Enable flexible security with adaptable user controls, datasets, and accessibility
- + Pool resources, talent, and information to broaden project reach and scope

## A CONTINUOUS LEARNING MODEL

What if you could:

- + Collaborate with third parties instantly and securely?
- + Leverage MDClone's analytics tools as well as third party tools to explore data and information?
- + Control user settings, accessibility, and available data with the click of a button?
- + Expand your project and area of interest instantly without additional data-loading?
- + Utilize MDClone's unique, privacy-protecting benefits to maintain data confidentiality while simultaneously driving innovation forward?

## An All-in-One Solution

The MDClone ADAMS Platform is a powerful, self-service data analytics environment enabling you to quickly organize and access information, explore ideas, and find new ways to optimize business functions, ultimately leading to impactful healthcare innovation and better patient outcomes.
